INTRODUCING OUR COMMANDO RANGE

Our new Commando Range is going to blow you away! This range is innovative and built for truly long term off-grid camping experiences. A durable sandwich foam construction provides peace of mind and reliable insulation. This fully electric van has features we guarantee you have not seen before.

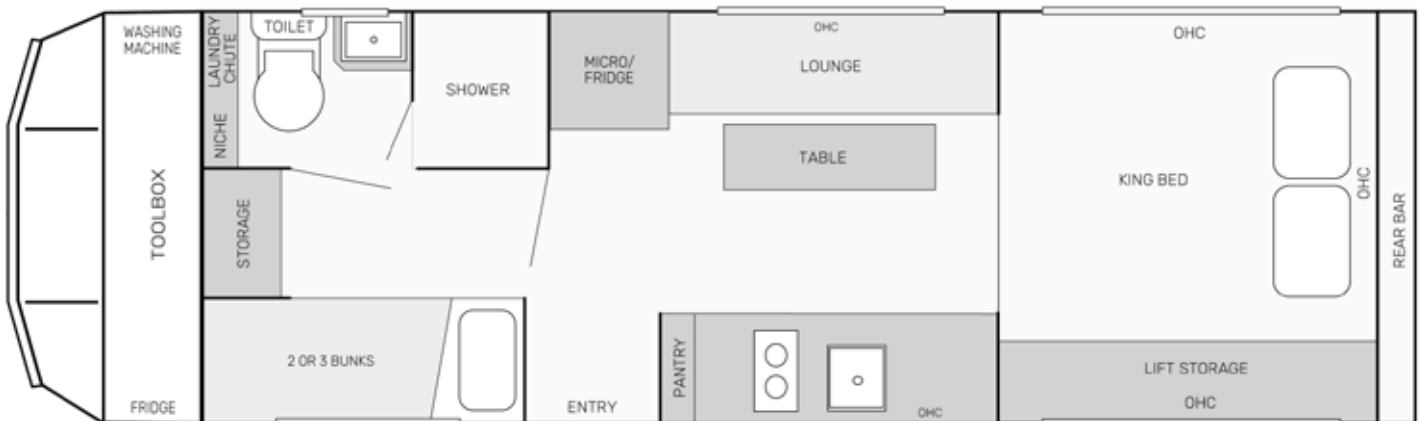

Designed to be almost fully self-sustainable with our innovative option to upgrade to the "Take Charge" solar panel system that doubles your solar intake with a simple slide out via the click of a button. Auto-levelling from your mobile phone, rear recovery points and rear departure angles for the tightest spots. Further features include our 2x under chassis stone flaps and also fully coated with raptor paint, which is a rubberized coating to reduce stone chips, salt water corrosion and is easy to maintain if you do have any damage.

This van boasts a fast fill system for our standard 2x110ltr tanks, honeycomb composite floor and a 96ltr EvaKool

slide out fridge. Our front/rear Commando Boxes, both feature exceptional storage capabilities and 17" Mickey Thompson tyres will have everyone turning their heads to get a second look.

Internally, we've covered every thoughtful area which includes an ergonomically designed truly full sized king bed, soft close doors/drawers, a dual rubbish bin drawer and a first-of-its-kind laundry chute. Ambient strip lighting and stunningly sophisticated interior colour selections will have you feeling like you're in a 5 Star hotel no matter where you camp.

The Commando Range is synonymous with luxury, durability, capability and an almost fully self-sustainable off-grid camping experience that's not been seen before on Australian roads (or off them). It's an electric range built right here in Melbourne, in Kokoda's Very Own Factory! Packed full of new features that we guarantee will have you as excited as we are!

SLEEPING

THE COMMANDO F226 CAN SLEEP UP TO 5

You asked for it. We delivered! Our F226 is fit for royalty with a true to size king mattress. Ergonomically designed to support your pressure points from head to toe and providing you the kind of comfort you'd expect from the fussiest of 5-star hotels. With large windows and ambient overhead strip lighting you may find it takes you longer than usual to leave your bed in the morning.

Large storage boxes on the side of the bed are a perfect place to store your belongings and provide a spacious bedside table. As a standard, the Commando Range provides Sirocco fans for each person per bed.

The Commando's bunk area has an opaque, light weight door for added privacy for the kids or guests using the ensuite area. Standard dual bunks are spacious and feature large windows, magazine pockets and reading lamps with USB ports and do not disturb blue lighting options. Storage isn't shy with a spacious wardrobe area and drawers below the double bunks.

Should you require space for a fifth camper, a triple bunk option is available. Overhead a roof mounted hatch provides further natural light and a fresh breeze when needed.

SLEEPING SPECIFICATIONS

Master Bed	KING, Positioned against the Wall, one side with lift up storage
Mattress	Foam Contoured Mattress to enable more comfort and better support
Master Cupboards	Overhead and side
Bunk Beds	2 x Bunks with Windows, Magazine Pocket with 1 x Drop Down Door Below & External Storage (Top 1.7m / Bottom 2.05m Long) <i>*OPTION to upgrade to 3 bunks</i>
Bunk Robe	Full Height with 3 x Drawers, Robe with Shelves
Magazine Pocket Holder	Medium

KITCHEN (INSIDE)

INSIDE COOKING & STORAGE

We know the Commando camper expects the creature comforts of home and the kitchen is no exception. Items often left out but warmly welcomed in this van make themselves useful in a luxurious yet functional area, ensuring this space is a thoughtful compliment.

Providing ample storage space, the durable soft close drawers and cupboard doors lock securely to keep your items in place when travelling and slide out rubbish/recycling bins will keep your living spaces tidy and sanitary. The family chef will feel like they've compromised nothing as the kitchen/dining area is finished with every thought considered. The waterfall benchtop features an induction

cooktop, spacious prep area, slide out half pantry, large sink with a pull-down spray tap and flick mixer.

A gracious seating and dining table means there's room for everyone to gather 'round the table, just like you would at home, to catch up on the days happenings while eating your favourite meal. An optional convection oven is available for those of you who just can't go without your Sunday roast or baking a cake for loved ones on those special occasions and all the necessary ingredients will easily fit in an accommodating 274 litre Thetford compressor fridge.

KITCHEN INSIDE SPECIFICATIONS

Induction Cooktop	Safairy Dual Hob
Range Hood	Sphere Recessed
Microwave	240vIt
Tap	Flick Mixer with Pull down Vegetable Sprayer
Cupboards	Light Weight & UV Resistant with Rectangle Push Buttons & Hidden Overhead Handles
Drawers	Titus Tekform Runners
Bench Top	Laminate with Waterfall Edge (Square Edge)
Pantry	Half (Slide-Out)
Fridge / Freezer	Thetford 274 Litre 2 way

OUTSIDE LIVING

EXTERNAL KITCHEN / LIVING

The design of the Commando F226's external kitchen was an exciting addition to our range. A large drop-down table neatly reveals spacious pantry shelves, flick mixer tap with a portable basin which can neatly be tucked away when not in use, and a 240v portable induction cooktop, which is gaining popularity over the bulkier pull out gas cook tops that... let's face it... take up a massive amount of storage space and require a gas flame that can't compete with even the slightest breeze.

The large electric awning will keep you protected from the elements while you relax and enjoy the outdoor entertaining area with those that mean the most to you.

A mount plate for the 32" smart TV is conveniently tucked into the recession of the pantry area because we know that at some point you're going to want to watch the latest release or catch that game you've been waiting for.

Dusk and dawn are no worries with the large LED strips that offer bright white and amber anti-bug lights with switch or convenient remote-control use.

Combine the above with a custom fit dual-compartment 96 litre pull out EvaKool fridge and the entertainment is endless.

OUTSIDE LIVING SPECIFICATIONS

Commando Outdoor Kitchen	Fold Down Kitchen under Awning with Pantry Shelves
Portable Induction Cooktop	240v Portable Induction Cooktop
Basin	Portable
Tap	Flick Mixer
Fridge / Freezer	96 Litre EvaKool Fridge / Freezer installed in Front Box
TV Wall Mount Plate	Inside Fold Down Kitchen Hatch
Awning	Electric With Internal buttons and Remote

CALL 1800 577 430 OR EMAIL ENQUIRIES@KOKODACARAVANS.COM.AU

EXTERNAL LIGHTING

LIGHT ME UP!

You can light up the Commando F226 easily and quickly with the push of a remote button.

Featuring 5x awning and non awning side white/amber lighting, and 2x 26" LED bar lights at the front and rear you will never be left in the dark again!

These lights are fantastic for use around the campsite, and a big hit when travelling in the dark to spot wildlife and be able to see all sides of the van when traversing some off road locations to get to your secluded spot.

The amber lighting is a favourite with us and what we usually use, as amber lights are known for emitting a warm, orange-ish light that is less attractive to insects, including mosquitoes and moths - and we can vouch they actually work in doing this!

The brightness, especially in the dark is amazing, with a push of a button you can see for miles all around you. You simply won't be able to go past the convenience this van has to offer with many features.

EXTERNAL LIGHTING SPECIFICATIONS

Light	4 x LED White / Amber Bug Lights
Light	1 x LED White / Amber Bug Light above External Kitchen
Light	Water Proof with Switch - Tunnel Boot
Light	LED Door Handle

COLD STORAGE
INDOOR & SLIDEOUT
OUTDOOR FRIDGE

**WATCH
VIDEO**

COLD STORAGE

INDOOR & SLIDEOUT OUTDOOR FRIDGES

The Commando F226 will take care of your every need, including indoor & outdoor fridges. You won't go hungry or thirsty again!

Internally we have a Thetford 274 litre Dometic compressor fridge. This has NO gas, which means you don't have to worry on your long travels and when you're in hot climates. This fridge will keep everything cool, whether you're parked up or driving. It is also quite generous with plenty of space for food for the whole family.

Externally we have a custom fit dual-compartment 96 litre pull out EvaKool fridge. This has been designed and built to fit in this space perfectly, so you don't need to worry about tying it up or how it will travel. Not only that, this whole compartment is insulated!

Talk about convenience, you no longer have to run back in to grab a cold drink or snack! Your entertainment is endless, just like your cool beverages will be.

FRIDGE SPECIFICATIONS

Internal Fridge / Freezer	Thetford 274 Litre 2 way
External Fridge / Freezer	96 Litre EvaKool Fridge / Freezer installed in Front Box

LAUNDRY

LAUNDRY CHUTE & WASHING MACHINE

Comfort and convenience is synonymous with our Commando Range and we are so proud to introduce an industry first with our Commando F226.

For those of you familiar with camping with kids off-grid, we can hear your collective gasp of approval with our “where have you been all my life” laundry chute.

Cleverly designed out of years of experience picking clothes up from the floor and moving them from place to

place, our ensuite laundry chute is the smartest spot to drop those dirty items when they’re no longer fit for wear.

Easily accessible from the outside of the van it’s an easy transition to the 3.5kg washing machine which is right next door to the laundry chute, in one of the front external boxes.

Streamlining your washing and turning chores into fun for the kids.

LAUNDRY SPECIFICATIONS

Washing Maching	3.5 Litre Front Loader
Laundry Chute	Lift Up Laundry Chute
Hot Water Service	20 Litre Electric
Ceramic Basin	White (Ensuite)
Mirror	Wall Mounted (Ensuite)

BATHROOM

FULL ENSUITE WITH SHOWER & TOILET

The Commando F226 has a separate shower/ensuite and is not lacking in storage spaces.

Tidy wall storage shelving and bench space compliment overhead and below sink cupboards.

Quad towel hooks will certainly get their use in this family van and are just an arm's length away from our bright and spacious shower with an adjustable rail for multiple head heights.

The Thetford swivel toilet is fitted with a SOG system which evacuates unwelcome odours from your cassette tank. A very welcome accessory for all on board.

This is also where our Laundry Chute is located, and is definitely a game changer!

This full ensuite is sure to please all passengers on board.

BATHROOM SPECIFICATIONS

Toilet	Cassette with toilet roll holder
Shower	Fibreglass with towel hooks to hold 4x towels
Ceramic Basin	White (Ensuite)
Mirror	Wall Mounted (Ensuite)
Hot Water Service	20 Litre Electric
Shower Rail	Adjustable
Grey Water	40 Litre Portable Bladder

**EXTERNAL
STORAGE**
STORAGE ALL AROUND

EXTERNAL STORAGE RAPTOR COATING AND STORAGE ALL AROUND

The Raptor Coated exterior of our Commando series has some stand-out features. Most notable are the front and rear boxes that are as tough as they are functional. The front box on our F226 leads the way with an external stone guard/triple compartment storage.

Perfect for your sullage hoses, fire wood and drop down jockey foot. Behind that on the awning side of the van, you'll find a massive, insulated slide out featuring a 96 litre custom fit EvaKool, dual-compartment fridge/freezer which also provides ample storage behind and above.

On the non-awning side of the box our fan favourite feature is the cleverly placed washing machine securely stowed next to the (first of its kind) laundry chute which is accessible from the ensuite. With extra cubby spaces for your washing goods, this is fabulous addition is a long-overdue feature for savvy campers on the go.

Bringing up the rear of our F226, the box sits atop of the departure cut-away making the back of this beast a real head turner. With two full size spare tyres mounted next to dual jerry can holders and above the secure drop-down storage, anyone will enjoy watching this van drive off into the sunset.

You can now fit everything you need within the van storage compartments, which means nothing needs to be stored in your tow vehicle anymore.

With dedicated locations for specific items, you can store pool noodles, tackle and fishing rods rigged up and in full length in their own tunnel boot, saving time, hassle and meaning they are locked up at night so you can relax.

The rear box can store all tools and power equipment, so you are always prepared for any situation you come across.

The front box shelving is designed to store 3 body boards and a small surfboard, so no one misses out and they are not left hanging around the campsite. This slide out storage is large enough to make sure you are prepared in which ever way suits you ... fit additional slabs of drinks, a generator, or even some more activities for the kids.

The full length oversized tunnel boot is great and a good spot to store your chairs, floor mat and a whole lot of additional items.

EXTERNAL BOXES SPECIFICATIONS

Raptor Coating	Front, Sides, Front / Rear Boxes & Chassis
Commando Front Box	Insulated Box for better Fridge Operation, Slide-Out Brackets for Built in 96 Litre 12v Fridge & Additional Storage Space Behind, with Shelf Above, Washing Machine.
Commando Rear Bar	Drop Down Storage Box, Remote Operated Reverse Light / Rear Work Light
Tunnel Boot Storage	At Cut away Under Bed, 1x Door on Awning Side
Tunnel Boot Storage	Full Width Oversized Tunnel Boot under bed
Jerry Can Holders	2 x 20Ltr in Commando Rear Bar
Spare Wheels	2 x Mounted on Rear

POWER GENERATION

POWERING THE COMMANDO

Commando's take off-grid capabilities serious. So much so that we've built the Commando range to take off-grid to the next level being as self-sufficient as possible.

Our standard line provides a 7.1KW 51v lithium storage, 1.65kw of solar capacity by way of 4 X 415w panels and a 5kw inverter to make everything seamless.

What does that mean for you? Let's simplify it...

Our system runs on higher (51) voltage than traditional, far less efficient set ups do. This allows you to run your appliances solely on solar (providing there is some or full sun) without needing to invert your battery.

This equates to being able to run your appliances for a considerable amount of time with NO solar input. That means you can keep on living like you do at home on the road.

Double those hours if you upgrade to our Take Charge System and you'll never want to go home! Worried about those 40 degree days and 30 degree nights? Not with the Commando range!

We know you'll love the power capabilities the Commando provides as much as we do!

POWER SPECIFICATIONS & UPGRADE OPTIONS

Solar Panels	4x 415w 70v Panels
Upgrade Slide-Out Solar	Take Charge System
Battery Power	51v 7.1kw Lithium under chassis, with Dual Fire Suppression System
Power	240V Weather Proof Outlet (Single)
Power	12V Weather Proof 12vlt Socket

RANGE**

**COMMANDO
F226**

TAKING YOU OFF-ROAD

DRIVING ON ROAD, ON TRACK & OFF ROAD

We know you want to be able to navigate every road possible in your Commando. And we know you want to do it with confidence and style. From high speeds on the bitumen, corrugated loose stone roads and those rutted tracks you're keen to get over and through to find the best spots out there.

The Commando offers a level 4 air bag system which provides smoother travel on every type of road but a clear stand out on corrugated roads or sandy beaches.

In these circumstances you'll usually want to drop your tyre pressure significantly for optimal, and safe travels. And it's not just the pressure on your van, but your tow vehicle as well.

With the on-board compressor and holding tank you are capable of managing your tyre pressures with confidence

and ease without needing to rely on finding the nearest petrol station... which can often be hours away when camping off-grid in some of Australia's amazing remote areas.

With a BOS jockey wheel, you no longer need to wind the jockey wheel by hand, and it travels in place so storing such a heavy bulky item is not a concern.

Raise the van with the push of a remote button to gain clearance over spoon drains, ruts or rocks and lower it when you need to avoid those low branches that get in your way. Auto-level or individually adjust when you park up to find your sweet spot.

The Commando F226 is taking camping to a whole new level, creating ease for you and allowing you more time to enjoy the great outdoors.
