COUPLES XCORE

SPECIFICATIONS

INTERNAL

Bed	East/West Bed
Mattress	Innerspring
Toilet	Cassette with toilet roll holder
Shower	ABS with towel rail
Ceramic Basin	White (Ensuite)
Taps	Flick Master
Side of Bed robe	With Shelves
Mirror	Wall Mounted (Ensuite)
Overhead Cupboards	Kitchen, Lounge, Ensuite & Master
End of Bed Robe	Single hanging robe with drawer
Niche	Bedside with 240vlt DPP & USB / 12vlt Socket
Magazine Pocket Holder	Medium
Drawers	Soft Close
Bench Top	Laminate (Square Edge)
Bench Top	Over Stove
Splash Back Kitchen	Full Height
Seating	See page 4 for model specs
Upholstery	Vinyl Leather
Bin	Double bin
Cupboard Doors	Light Weight & UV Resistant
Handles	Rectangle Push Button
Overhead Handles	Hidden
Hinges	Salice
Hatch Roof	2 x 700mm x 500mm & 1 x 450mm x 400mm
Door	Triple Lock with sep Security Screen
Floor Vinyl	Durable Modern Design
Windows	Double-Glazed

APPLIANCES

Range Hood	Sphere Recessed
Oven	3 Gas / 1 Electric Burner, Mini Grill & Oven
Fridge / Freezer	See page 4 for specific model specs
Hot Water Service	28ltr Gas/Electric
Washing Machine	See page 4 for specific model specs
Microwave	240vlt
TV & Bracket	24" Smart TV
Air Conditioner	Belaire Houghton HB3400 Reverse-Cycle (Heating & Cooling)
Stereo	Portable Bluetooth Speaker
Diesel Heater	with 5 litre Diesel Tank mounted on Toolbox

PLUMBING

Shower Rail	Adjustable
Sink	Single Bowl
Gas Bayonet	Front
Gas Bottles	2 x 9kg
Water Tanks	2 x 110Ltr
Tap	On A-Frame
Grey Water	Portable Tank

INTERNAL ELECTRICAL

Lighting	Strip Lighting above all overheads, also below overheads in Kitchen & Lounge
Power Points	240vlt DPP (Master Bedside, Lounge, Kitchen, Ensuite)
Solar Regulator & Dc/Dc Charger	50A and 30A
Battery Management System	Victron Battery management system with Cerbo 5" display screen
Invertor	Victron 3000w 240v Invertor / Charger with 120a charge
Water Tank Guage	Digital gauges
Fans (12v)	See page 4 for specific model specs

COUPLES XCORE

SPECIFICATIONS

EXTERNAL ELECTRICAL

Light	2 x LED White / Amber - Annexe Lights
Light	1x LED White / Amber - External over front tunnel boot light
Light	Water Proof with Switch - Tunnel Boot
Light	LED Door Handle
Battery Power	Single 12v 300AH Lithium, comes with 2nd Battery box for future upgrade
Power	240V Weather Proof Outlet (Single)
Power	12V Weather Proof 12vlt Socket
Solar Panels	600w (3 x 200 watt panels)
Brakeaway	Unit & Switch
Reverse Camera	Bluetooth and no longer requires tow vehicle installation

CHASSIS & SUSPENSION

Suspension	See page 4 for specific model specs
Wheels	16" Alloy
Tyres	Heavy-Duty Off-Road M/T
Hitch	D035
Chassis	Chassis - Painted Black (Not Raptor) - 6" Dura-Gal
A-Frame	6" DuraGal
Axle	See page 4 for specific model specs
Mud Flaps	Back

CONSTRUCTION

XCORE	ABS Insulated Composite Panel, Walls, Front, Rear, Roof & Floor <i>See page 5 for details</i>
-------	-----------------------------------------------------------------------------------------------------

EXTERNAL

Awning	Manual Roll-Out
Picnic Table	Fold-Out
Step	Double Pull-Out (Manual)
TV Wall Mount Plate	Mounted Near Picnic Table
Tunnel Boot	Dual Access (Front)
Tunnel Boot	Dual Access (Rear)
XCORE Front Toolbox	Front bin that houses the gas bottles and additional storage area, Firewood Storage on top Slide Provision each side
Counterstrike Rear Bar	With storage door
Jerry Can Holders	2 x 20Ltr
Spare Wheels	See page 4 for specific model specs
Tyre Repair Kit	Tyre Repair Kit
Stabiliser Leg Supports	4 x Drop Down
Jack	Hydraulic

PROTECTION

Raptor Coat	Front
Raptor Coat	Back
Raptor Coat	Sides
Stone Guard	Water Tanks

COUPLES XCORE

XCORE CONSTRUCTION

THE BENEFITS OF USING XCORE CONSTRUCTION?

Lightweight: **XCORE** construction allows for the creation of lightweight caravan shells without compromising on strength and durability. This lightweight design makes the caravan easier to tow and maneuver.

Strength and durability: Despite being lightweight, **XCORE** composite materials are incredibly strong and durable. They can withstand the rigors of travel, including road vibrations, impacts, and exposure to harsh weather conditions, ensuring that the caravan remains in good condition for years to come.

Insulation: **XCORE** composite materials offer excellent thermal insulation properties, helping to keep the interior of the caravan comfortable in both hot and cold weather conditions. This can result in energy savings and improved comfort (like no more cold feet from the floor!).

Resistance to moisture and corrosion: **XCORE** composite materials are often resistant to moisture and corrosion, making them ideal for use in caravan construction. This helps to prevent issues such as rot, rust, and delamination, prolonging the lifespan of the caravan and reducing maintenance requirements.

Design flexibility: **XCORE** composite construction allows for greater design flexibility compared to traditional materials like aluminum or steel. We can create sleek, modern designs with smooth curves and contours, as well as integrate features such as large windows to enhance the aesthetic appeal and functionality of the caravan.

WHAT IS **XCORE** CONSTRUCTION?

The **XCORE** composite panel material that Kokoda Caravans use comprises of three high-quality layers. The two outer layers are made from high-quality fibreglass GRP (Glass Reinforced Polyester).

The inner layer is made from structural XPS foam. XPS stands for eXtruded, high strength, closed-cell PolyStyrene. The XPS foam we use is 400 kPa rated, which has a higher structural strength than most XPS foam used by other manufacturers.

Our **XCORE** composite panels have a super strength to weight ratio and are durable for the Australian Outback. This technology is one of the highest quality composite products around Australia.

After much research and trialling of many types of construction forms, we found **XCORE** to be the most superior construction as it offers a compelling combination of lightweight design, strength, durability, insulation, and design flexibility. Inside our **XCORE** composite panels we use XPS Foam, which is a closed cell foam and doesn't allow water to soak. XPS foam also has superior thermal properties over open cell foams making it a far better insulator. Unlike aluminium frames, that are heavier, can brake, can oxidize (rust), lose insulation for each part of the frame, lose insulation for wiring running in walls, and create condensation from the aluminum tubes, by using **XCORE** construction you have a far more superior material used and you can feel confident of the longevity of your van.
