

The Ultimate Off-Grid Bathroom Experience

Removing pain points.

No More Mess.

No More Smell.

No More Dump Points.

Game-changing Bathroom System

- No more concerns about toilet hygiene, privacy, loud noises and manual waste management
- True off-grid convenience with no black water tanks or dump points so you can travel further for longer
- Low maintenance system operates silently leaving only a small tray of ash that can be disposed effortlessly and stress-free
- Perfect for families & groups that need multiple use of a hygienic bathroom over a short period
- Power use is effortlessly handled by the advanced electrical system ensuring continuous, worry-free operation.

No Smells or Dump Points

Say goodbye to the hassle of using public dump stations, all while enjoying a fresh and odour-free bathroom at all times.

- ▶ Empty an odourless tray of sterile ash every 1-4 weeks
- ▶ No need to see, smell or manually handle waste
- ▶ No lingering smells inside or outside the caravan.

For many travellers, the biggest hesitation about caravanning isn't the adventure - it's the experience. The thought of dealing with waste tanks, unpleasant odours and the dreaded dump points can be enough to turn people away from off-grid travel altogether.

The Counterstrike Vincere redefines luxury by blending cutting-edge technology with thoughtful design, ensuring your off-grid journey is as comfortable as it is generous.

The revolutionary waterless, odour-free and low maintenance incineration toilet system discreetly and hygienically eliminates waste, including product matter, reducing it to a sterile tray of ash.

Ultra-quiet Incineration Toilet

The powerful onboard electrical system turns waste into sterile ash.

- ▶ Incinerates all waste, including toilet paper and feminine hygiene products
- ▶ Waste is chamber sealed and incinerated in cycles leaving only non-toxic ash
- ▶ Tray of sterile ash accessible externally
- ▶ System operates silently with only a quiet fan to be heard.

No Water Required

A revolutionary 100% waterless system exclusively developed and built by Kokoda.

- ▶ No black water tanks or plumbing
- ▶ No extra water use.

Efficient and Electric Powered

Use as often as you need as the advanced system handles frequent use without draining the power supply.

- ▶ Each flush cycle consumes 1.5kW of power
- ▶ Toilet is designed to handle frequent use
- ▶ All other onboard appliances can be used at the same time.

Frequently Asked Questions

▶ How long does the next person need to wait after someone has used the toilet?

No waiting time required as the toilet can be used immediately after someone else. The incineration process runs in the background, meaning multiple people can use it back-to-back without issue.

▶ What if five people use the toilet in an hour? Will it still work?

Yes. The incineration process is designed to handle frequent use. Even if five people use the toilet in an hour, the system continues to function normally. The waste is stored in a chamber and incinerated in cycles, ensuring that there's no disruption to usage.

▶ Is there any odour while using the toilet?

No. Unlike traditional caravan toilets this system eliminates odours, both inside and outside the caravan. The waste is sealed and incinerated, leaving only sterile ash, which is non-toxic and odourless.

▶ What happens when the ash tray fills up?

The only maintenance required is emptying the small ash tray every 1-4 weeks, depending on usage. The ash is sterile making disposal easy and discreet.

▶ Will the toilet drain my caravan's power system?

Not at all. Each flush cycle uses approximately 1.5kW of power, which the Counterstrike Vincere is built to handle and more. With its 7.3kW solar system, 20-30kWh lithium battery bank and back up 8kW generator, power availability is never a concern.

The Ultimate Off-Grid Hot Shower

Luxury without limits.
Endless Hot Water.
Maximum Comfort.
No cold showers.
No rushing.
No water limits.

For most people, caravanning means sacrificing time under the hot water and a proper clean due to onboard water limitations. You are forced to get into a small space, wash and get out quickly - not exactly a relaxing experience.

The Counterstrike Vincere has completely redefined the caravan shower experience, ensuring you can enjoy a long, luxurious shower in a spacious bathroom without guilt or worry about privacy or running out of hot water. Combining comfort, sustainability and technology, this shower is unlike anything seen in a caravan before.

The Future of Luxury Showering Off-Grid.

The shower you've always wanted wherever your adventure takes you.

- ★ No more rushed and cold showers
- ★ Take a long, relaxing shower that never runs out of hot water
- ★ Stay fresh and clean off-grid with access to a full size luxury shower wherever you are
- ★ Conserve water with sacrificing longer showers with an advanced water generation and recycling system
- ★ Experience ultimate privacy thanks to the smart glass shower screen
- ★ Perfect for families and long-term travellers who want to shower without the worry of water limits

Smart Privacy at the Touch of a Button

Floor to ceiling glass shower screen that creates a private sanctuary.

- ▶ Smart glass shower screen instantly turns opaque at the touch of a button
- ▶ Full size, spacious shower space
- ▶ Choose between an open, airy feel or complete privacy.

Unlimited Hot Water and Showering Time

Just the shower you've always wanted wherever your adventure takes you.

- ▶ Shower for over 30-minutes
- ▶ Enjoy continuous, on-demand hot water
- ▶ Sustainable and uninterrupted supply.

Multi-Head Adjustable Rain Shower

Unlimited hot water, giving you the kind of long, relaxing shower you'd never expect in a caravan.

- ▶ Designer finish multi-head rain shower, tapware and lighting for a 5-star hotel finish
- ▶ Multiple adjustable spray options and water outlets
- ▶ Personalise your ideal temperature.

Advanced Water Generation and Recycling System

Designed for extreme conditions the water system works effortlessly even in remote environments.

- ▶ No waiting times for a hot water tank to refill
- ▶ Used shower water is captured, purified and reused
- ▶ Enjoy extended showers without draining your fresh water supply.
