

The Ultimate Ducted Heating and Cooling

Precision Climate Control for Every Space - Without the Noise.

No hot spots.

No freezing corners.

No noisy aircon units clunking on and off.

Customised Airflow in Every Space

Zoned controlled temperature and vents.

- ▶ Each living zone has customised airflow settings and dedicated vents
- ▶ Fully open, partially open, or completely closed vent control
- ▶ Ducted vents in each sleeping space for all night comfort

Traditional caravan air conditioning and heating systems are often loud and inconsistent. Most rely on single-vent, rooftop-mounted units that clunk on and off, blast air in one direction, and leave some areas too hot, too cold, or barely affected at all.

The Counterstrike Vincere delivers five star comfort with a 5kW ducted heating and cooling system that ensures perfect climate control in every corner - without the noise. Say goodbye to uneven temperatures, loud air conditioning units and ineffective heating.

No more clunky roof-mounted air conditioners or noisy fans struggling to circulate air. Just smooth, consistent, and whisper-quiet airflow for a truly relaxing experience.

Zoned Climate Controlled Comfort for Every Traveller

Total climate control – customised for every traveller, every space and every adventure, in absolute silence.

- ★ Every space has its own dedicated air vent
- ★ Fully adjustable airflow for personalised comfort
- ★ Perfect temperature control, whether heating or cooling
- ★ Ducted for whisper-quiet, efficient and even air distribution.

Consistent Temperature

Ensures consistent temperature control throughout the entire van.

- ▶ Ducted 5kW Air Conditioning and Heating
- ▶ Consistent temperature distribution
- ▶ 360° Rotatable Vents to get air where you need it
- ▶ Fresh and comfortable evenly circulated air
- ▶ No more hot spots or freezing corners.

Whisper-Quiet Operation

The ducted system removes the harsh noise of traditional roof-mounted units.

- ▶ Smooth, silent airflow without the disruptive cycling on and off
- ▶ No loud aircon clunks or gushing fan noise
- ▶ Air evenly and quietly spread.
