

#### Advanced Technology, Effortless Control

No more guesswork.
No more manual setup.
No more worrying about power or water.
No more stress on the road.

Most caravans rely on outdated, manual technology making power management and remote travel capability frustrating. With so many advanced features packed into the Counterstrike Vincere managing them shouldn't be complicated. That's why we developed a smart van interface – an intuitive system powered by Garmin technology, designed to simplify every aspect of caravan operation.

With a built-in 10" touchscreen above the fridge, a portable 7" touchscreen, and an in-vehicle mount for on-the-go access, you have full control over your van's systems wherever you are - inside, outside, or even while driving.

#### Easy, Intuitive Garmin Smart Control

An intuitive system designed to simplify every aspect of caravan operation controlled from anywhere.

- ▶ 10" built-in touchscreen central control hub
- Portable 7" touchscreen with mounts in master bedroom and external kitchen
- ▶ Additional in-vehicle charging mount
- Monitor and control power, water, lighting, climate, airbag suspension and navigation remotely
- ▶ Simplified into user-friendly touchscreen interface
- No complicated buttons or manual controls

## Smart Lighting with bug-resistant Amber Mode

Designed for ultimate comfort, functionality and control.

- ➤ Complete remote lighting control throughout the inside and outside of van
- One Screen touch control of main interior lights to soft ambient lighting

## Real-Time Driving Integration

Monitor your systems seamlessly **while towing** ensuring you always know the best path forward

- ► In-Vehicle Mount for On-the-Go Monitoring of essential systems
- Instant tyre pressure alerts reducing the risk of blowouts or uneven wear
- Garmin Navigation with Off-Road Maps provide detailed information
- Wi-Fi Live Cameras feeds for Extra Visibility of surroundings and blind spots

## Seamless technology at the touch of button

Just simple, intelligent control—right at your fingertips, wherever you are.

- No guesswork as everything is clear and easy to control
- Faster, effortless setup
- Total peace of mind while keeping an eye on key systems
- Real-time monitoring while towing
- Smarter power and water management
- Safer, more confident towing and off-road navigation
- Simple, user-friendly controls with no complicated systems to learn
- Instantly check water and power levels without hassle

# Total Power and Water Management

Complete control to know exactly how much power and water you have, how much you're generating and where it's being used.

- Monitor and control both power and water production in real-time
- Real time information so no need to check gauges
- Monitor battery status, solar input and generator usage
- Track and manage fresh water levels, water generation, filtration status and grey water recycling

### Automatic Levelling and Stabilising for instant setup

Arriving at remote locations is effortless at the push of a button.

- Air suspension auto-levels the van in seconds with one-touch control
- ▶ Fully integrated into the Garmin Smart Interface
- Jockey Wheel Control System easily move the van into position
