BIG, BOLD & BEAUTIFUL

We don't need to brag about our Force 8. It speaks for itself. Clever in design, visually impressive and built for the toughest trips this van is perfect for the family that isn't willing to compromise. Open and spacious living and kitchen areas coupled with 1.9m long bunks and stacks of storage is just what you want to keep everyone happy on the road. The bunk area can also be sectioned off with a concertina door giving everyone a bit of privacy when needed.

TOUGH TESTED

Peace of mind is key when taking the roads lesser known and the 6" Australian made DuraGal steel chassis provides just that. We also know our Force 8 Family are the type of campers that don't want to be limited by bumps in the road so we've added a 2" riser to the chassis and a cut-a-way at the rear to ensure you're not going to get hung up on anything other than debating the next adventure. Checker plating doesn't just look good, it protects the Force 8 from the rugged terrain we know it's bound to seek out.

INTERNAL

SMART SPECS

We know the Kokoda Community has high standards so we pack standard features into the Force 8 we know they'll expect. 340 watts of solar and 200AH of battery will keep your devices charged. Ample 240v sockets throughout and USB charging points feature in each reading light located at the beds and living area. Every Kokoda family van also provides an outdoor shower and tool box with dual slides that will house a generator and a 12v socket to plug in the external fridge/freezer. Stone guard, dual spare tyres and 20L jerry can holders are just some of features provided as a standard.

CONSTRUCTION

Frame	Meranti
Insulation	Walls & Roof
