A FORCE 2 BE RECKONED WITH

What makes this van so special is an incredibly generous club lounge at the rear of the van. Providing panoramic sweeping views of the destinations you've been dreaming about. The Force 2 is cleverly designed with three distinct and separate zones. The bedroom can be completely isolated from the ensuite and living areas providing a truly private area to lay your head without interruptions. Perfect for the couple who wakes up with different body clocks!

LET'S TALK TECH

A state of the art BM Pro Genius 30-25 charger and 30am solar regulator takes charge of the battery management system which is fed by 2x170w solar panels and 2x100AH AGM batteries. Still want more off-grid capability? No worries, inverter and lithium upgrades are available options on every Kokoda. Electric gauges and an easy to use LCD display panel easily allows you to monitor the water levels of the standard 2.95ltr fresh water tanks.

Insulation	Walls & Roof
Cladding	Flat Aluminium Composite (Silver)

TOUGH FOR ROUGH CONDITIONS

The Force 2 is more than just an apartment on wheels, it's got the toughness to take you on an adventure you'd not get in your average van. The 2" riser on the 6" DuraGal Australian steel chassis gives this van an impressive look right from the start. Coupled with ALKO's Enduro X suspension and 16" wheels you know you're not going to get hung up on the bumpy bits along the way. The D0-35 articulated hitch, durable suspension and a durable van means you're also getting a more comfortable tow even on rough terrain.
