INSIDE THE M.I.A.

Upon entry to this tough tested family van you'll note that it's deceptively spacious inside. This is due clever adaptation with an East/West master bed, maximising internal living area without compromising on the creature comforts. Ample bench and living space for a van of its length, you'll also note the M.I.A. has got storage everywhere. Providing plenty of bench space, a spacious L-shaped lounge and 1.9m bunks there is enough room for the whole crew of campers.

KOKODA TESTED & APPROVED

Kokoda is known for rugged, off-road vans and this one definitely delivers. Built for the toughest conditions, this rugged thrill seeker will get you where you want to go. How do we know? Because we've personally tested it and can confirm, it really is the adventurers van that has it all. At 19'6" it is capable of packing enough space for the growing family and everything they want to bring with them on their travels but still compact enough to get into the lesser known spots. Once the neighbours see this van parked in the drive, they will know why you've gone MIA.

Cladding (Sides)	High Profile Aluminium (Carbon Fibre Black)
Cladding (Front & Rear)	Flat Aluminium Composite (Matt Black)

VERSATILE INSIDE AND OUT

The family that takes their holiday into the Outback doesn't want to compromise on features. So we've packed them into this 19'6" van. Dual axels and a mighty tough Al-Ko Cross Country off-road suspension make for a smooth yet sturdy ride. The spacious bunk area allows for an optional third bunk and the ability to add a concertina door to separate the kids/parents zones. Outside the party will continue into the evening with our standard entertainment hub to mount the 24" TV along with 2 LED strip lights and outdoor speakers with Bluetooth connection. Don't miss family rivalry games just because you're on the road!

Optioned on Reverse Camera.
